Education

University Of Texas At Austin

Master of Science in Data Science

Expected Graduation: Dec 2027

University of Central Florida

Bachelor of Science in Computer Science

Technical Skills

Languages: Python, Java, C#, JavaScript, SQL, Swift, C
Backend/Frameworks: Spring Boot, FastAPI, Node.js, Express, React, Next.js, REST APIs
AI/ML & Analytics: Databricks, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy
Cloud/DevOps: AWS, Docker, Kubernetes, Jenkins, Git, GitHub, CI/CD
Databases: PostgreSQL, MySQL, MongoDB, pgvector
Development: Agile/Scrum, JWT Authentication, Data Structures & Algorithms

Work Experience

Southern Glazer's Wine & Spirits *OneTech Data Intern - AI and Automation*

May 2026 – Present

- Developed AI/ML solutions and internal automation tools that improved business workflows, forecasting processes, and enterprise productivity.
- Collaborated with data engineering and business teams to analyze large datasets, monitor model performance, and support data-driven decision making.
- Built and supported scalable data and analytics workflows, including data preprocessing, evaluation metrics, and backtesting for AI-driven initiatives.

Lockheed Martin *Full Stack Software Engineer Intern | Systems Engineer Intern*

Sept 2024 – May 2026

- Developed an internal reporting web application with a searchable data grid, enabling senior stakeholders to view, filter, and manage structured workforce data more efficiently.
- Built a Python-based Excel transformation tool to standardize legacy datasets for a new internal data platform, saving employees approximately 30 minutes per sheet by eliminating manual table restructuring.
- Improved systems engineering processes by gathering requirements, documenting workflows, and creating onboarding/reference materials for targeting-system programs, reducing new engineer ramp-up time by **25%**.

Apple *Technical Specialist - College Program*

March 2023 – Sept 2024

- Resolved user cases in **Apple's CORE system**, managing **75+** weekly issues and maintaining a **92%** satisfaction rate.
- Created and maintained detailed technical case notes for senior engineers, improving issue traceability.
- Provided mentorship and career guidance to peers, contributing to multiple students earning **Apple internships**.

Project Experience

Secure Payment Network | *Java, Spring Boot, Python, PostgreSQL, JWT, Scikit-learn, Docker* **April 2026 – May 2026**

- Developed a distributed payment platform with **22 REST endpoints** for authentication, two-factor verification, wallet operations, transaction history, and audit workflows.
- Secured financial workflows with short-lived JWTs, bcrypt hashing, endpoint-specific rate limits, TOTP/email verification, recovery codes, and PostgreSQL-backed idempotency keys to prevent duplicate transaction execution.
- Integrated a machine learning-based fraud detection service with a Random Forest model trained on **10,000** synthetic transactions, scoring withdrawals/transfers in real time using 6 behavioral features and audit-logging high-risk activity.

Lightweight Energy Meter Aggregator (LEMA) | *React Native, PostgreSQL, Express, Node.js* **Aug 2025 – April 2026**

- Created a cross-platform mobile app projected to cut facility energy monitoring costs by up to **80%**, enabling scalable deployment for buildings over **5,000 sq. ft.** without requiring **\$50k–\$100k** enterprise systems.
- Implemented LAN-based meter polling with offline data caching, achieving **95%+** uptime and full functionality without internet access during connectivity interruptions.
- Developed analytics dashboards and CSV/XLSX/PDF export workflows to streamline energy reporting, reduce manual spreadsheet work, and improve visibility into facility usage trends.

Leadership Experience

Theta Tau Professional Engineering Fraternity *Treasurer*

Jan 2025 – Jan 2026

- Optimized the fraternity's budget and financial systems by conducting a full audit of recurring expenses, cutting unnecessary costs by **25%**, and strategically reallocating resources toward high-impact academic and professional events.
- Generated comprehensive **monthly financial reports** for the executive board, introducing clear visual breakdowns and comparative year-over-year analyses that improved fiscal transparency and enabled smarter, data-driven decision-making.
- Designed and led a weekly **financial literacy program** for fraternity members, presenting on topics such as budgeting, credit management, investing basics, and post-graduate financial planning to improve members' financial awareness.
